

Report 7

Miro Board of Trajnet++ LSTM Implementation

- Main part of the report for today (I will go through this in the meeting):
https://miro.com/app/board/uXjVM_fG7Xs=/?share_link_id=206225194466

Currently working on

- Removing prediction by Encoder
- Area manipulation to force field
- Change loss to be only based on prediction sequence since observed sequence now is equal to the ground truth
- Update new logic to also run on CUDA (GPU) instead of cpu
